4 Cents Per Copy—\$2.00 Per Year

THE J. E. JONES LETTER

LOOKING THE DOOR
A week is to be devoted this Spring to an educational campaign intended to impress upon the public the national importance of saving our remaining forests. The Government is in charge of the campaign. President Coolidge has backed it up with an official proclamation. It has already been brought out that one-third of all forest land in the United States is composed of small wood lots.

According to the best estimates the area of forests in the United States originally covered 850,000,000 acres. There were five great forest regions—the northern, the southern, the central, the Rocky Mountain and the Pacific. At the present time there is said to remain 470,000,000 acres of forest land of all kinds in the United States. When the settlement of America began the forests had no particular value, and no one thought about saving the trees until fifty years ago. Wasn't there more than enough timber to build the country? Thirty-three years ago the Federal Government undertook to save a few sticks from the maws of the timber thieves who had grown fat and arrogant upon their profits derived from cutting trees from public lands. As a result of the foresight developed at that time there is now 157,502,700 acres of forest land under control of the National Forest Service.

Among the more flagrant methods that have been used to defraud Uncle Sam of his lands have been those brought about through the mining laws. The great land grants for canals and railroads diverted millions of acres of timber land to private control. The lax administration of the homestead laws left the way open for lumbermen and speculators to secure millions of acres of land through "stool pigeons" and "squatters," who spent the required night on the ground every few months which enabled them to prove up.

The worst story of all concerns the wilful waste of timber by the early logging methods. Only the biggest trees were considered worth taking, and a trail of fire usually swept the wreckage in the remaining timber that was left by the lumbermen. Thus, far more timber was wasted and burned than was put to any material use. Instead of cheap lumber we now have to pay exorbitant prices for it in small quantities, and the industry is organized to the limit. Occasionally the Government has to go after some of these organizations and give them directions about how to behave.

The Secretary of Agriculture in his announcement of the observance of "American Forest Week," says that "when American citizens more fully realize the rapid rate at which this nation's timber resources are being exhausted, a national forestry policy with Federal, State and local governments all performing their part will be assured." Which leads one to inquire just when that "full realization" may be expected to dawn upon this intelligent nation of ours. Wouldn't it be more in keeping with the facts in the case to refer to that old proverb, which reads: "When the horse has been stolen, the fool shuts the stable."

FEDERAL ADMINISTRATION
With the disastrous experiences and losses of the Federal Government with regard to the country's timber resources a matter of public record, it seems difficult for many people to understand why public administration has not been able to check more of these scandals in oil. The fact is that the administrative officers have usually been conscientious and "on the job," but they have not been able to get beyond many obstacles placed in their way by statutory laws that govern their mode of procedure, and often prevent rather than aid them in performance of their duties. The Doherty and Sinclair oil interests, for instance, urged laws and departmental regulations upon Washington, and got what they wanted, before it was discovered that what they wanted was the very worst thing that should have been considered. Public administration is usually handicapped with the best tools that are furnished public officials to work with. And they do the very best they can.

ALUMINUM
The average consumption of aluminum in automobile manufacture, exclusive of Ford machines, is one hundred pounds to the car. In 1921 the new aluminum produced in the United States had a value of less than eleven million dollars, and this has increased until the production in 1924 reached \$17,867,000. Aluminum has been worth from twenty-seven to twenty-nine cents a pound during recent months.

Aluminum is becoming a wonderful material in many ways and is destined to become a more important part of our life.

(Continued on page 8)

DANIEL S. HASTINGS

Word has been received in town of the death of Daniel S. Hastings which occurred at the home of his daughter in Dorchester, Mass., Monday. The remains will be placed in a receiving tomb and funeral services will be held at Bethel later in the spring. A more extended account will be given next week.

GOULD ACADEMY NOTES

Rehearsals are being held for the Senior Class play to be presented early next term. The play will be the adaptation of Louisa Alcott's "Little Women," so successfully staged in Boston last winter.

Miss Christine Farwell, daughter of Rev. H. C. Farwell of Salem, Mass., will enter the Academy after the Easter recess.

It is hoped that many of the friends of the school will attend the gymnasium exhibition to be held the second week of next term. This will include demonstrations of the work done by both the boys' and girls' classes.

Coach Friedrich, accompanied by a group of Academy boys, attended the Bates Intercollegiate Basketball Tournament at Lewiston, Friday evening and Saturday.

Two games in the series of interclass basketball games were played in the gym Tuesday afternoon, the Juniors defeating the Freshmen 49 to 19 and the Sophomores winning from the Seniors 42 to 20. The final game to determine the class championship will be played between the Juniors and Sophomores Wednesday afternoon.

A framed picture of last year's successful basketball team, with the season's scores artistically engraved has been hung in the upper hall at the Academy. The work was done by Shaw's Business College.

WEST GREENWOOD

Mrs. John Gill was called to Rumford last Thursday to see her father who is ill.

Mrs. Harold Shaw and two children went to Rumford to see her grandfather, March 12th. Lillian Cross spent the week end at Locke's Mills. Calvin Cummings was a caller in town recently.

John Shaw is spending a few days in Rumford.

Annie Cross spent the week end with Miss Marjorie Farwell in Bethel. Morris Chase is cutting birch for Mr. Edwards on the rabbit road.

Mr. Bennett of Bethel was in town Sunday. Elmer Cross was in this vicinity one day last week.

NORTH NEWRY

Mr. and Mrs. F. W. Wright went to Erie, Sunday A. M., returning Monday.

Mr. Richard Blake and family are visiting relatives in South Paris. J. L. Perren went to Massachusetts, Saturday.

Schools in town opened Monday, March 9, with the same teachers, except the "Head of the Tide." Miss Ruby Meyer of Kennebec, Me., is teaching there this Spring and boards at W. B. Wright's. Mrs. Sadie Allen is assisting with the cooking in P. M. Walker's boarding house.

Mrs. H. H. Hanson and daughter, Ella, visited at the Head of the Tide school, Monday. Leon Hanson has gone to Hallowell to work for Eli Stearns.

SOUTH WOODSTOCK

School began Monday after a vacation of 5 weeks. Alice Hendrickson and Mrs. George Hendrickson were in South Paris and Norway, Tuesday.

Herman Andrews was in Lewiston, Friday.

Mrs. H. M. Andrews was a guest of relatives in South Paris, Friday.

Mr. Harry Bennett of South Paris was at his farm here and was a guest of Alvan Hendrickson, recently.

Mrs. Alvan Hendrickson, Miss Mary Hendrickson and Mrs. Walter Littlehale were in South Paris and Norway, Tuesday.

Mrs. Ernest Kirk, who has been visiting her son, Harold Kirk, and family in Torrington, Conn., has returned home.

Mrs. Archie Verrill was called to Bethel, Mass., recently by the death of her brother-in-law, Albert LaCroix.

Mr. and Mrs. F. L. Edwards and Mrs. F. P. P. P. and Thomas Brown attended the Abner's meeting in Portland last week.

CHRISTIAN SCIENCE CHURCH READY FOR OCCUPANCY

Bethel Society Formed in 1922. First Service in New Church To Be Held Next Sunday.

The Christian Science Society of Bethel will hold their first services in their new church on Sunday, March 22. This Society held their first meeting in Bethel on May 7, 1923, but was not organized as a Society until Nov. 1st of that year. The meetings were held at private homes until August, 1923, since which time the Society has used the Grange Hall.

In the summer of 1924 the Society purchased a strip of land on Chapman Street, just above Old Fellows Hall and started the erection of a church. The church is 24 by 48 feet and is of bungalow style. The interior decorations are white, and makes a very cheerful and attractive room. The seating capacity is about one hundred. As one enters the room his attention is attracted by two mottoes painted in black, one on either side of the altar. One expresses the words of Christ Jesus, "Ye shall know the truth and the truth shall make you free;" the other is from "Science and Health with Key to the Scriptures" by Mary Baker Eddy, "Divine Love always has met and always will meet every human need."

The auditorium is well lighted by handsome globes which give indirect lighting effects. The pews are made of selected oak stock. The altars are on a stage at the front of the room, and on either side are rooms for the readers. The windows are single sash below and divided into five sections with triangular panels of colored glass at the top and bottom of the sash which makes a very beautiful and attractive window. There are two cloak rooms, one on each side of the entrance to the church. On the right as one enters is a stairway leading to a spacious basement. The building is heated by a one-pipe furnace. Services are held at this church on Sunday as follows: Sunday School at 10 a. m., church service at 10:45. The public is cordially invited to attend any or all of the services.

THE NEW CHURCH BUILDING IN BETHEL, MAINE.

BETHEL AND VICINITY

Mr. and Mrs. A. Verville were in Portland, recently.

Mrs. L. E. Luntz visited friends in West Bethel, Thursday.

Mrs. Ada Barlett, who has been ill with the grip, is improving.

Mr. and Mrs. Walter Inman were in Lewiston a few days last week.

Mrs. Percy Andrews and Mrs. Harry Inman were in Berlin, Thursday.

Sheriff Bennett was a business visit in South Paris one day this week.

Mrs. Melissa Tuell and Miss Maria Pease are spending a few days in Boston.

Mrs. Albert Heath was the guest of friends in West Bethel one day last week.

Miss Vivian Wright spent the week with her parents, Dr. and Mrs. I. H. Wright.

Mrs. A. E. Bailey has gone to Lisbon Falls to spend a few weeks with her son and family.

Mrs. Albert Orser left for Massachusetts, Wednesday, where she will spend some time with relatives.

Friends of Mrs. Ada Wright of Claverack, N. Y., will be glad to learn that she is improving from a recent severe illness.

Mrs. Edna of Skowhegan, who has been the guest of Mr. and Mrs. L. L. Farver, returned home Friday. Mrs. Farver accompanied her and will spend a week with her parents, Mr. and Mrs. Hamdick.

A public school party will be held at East Bethel Grange Hall, Saturday evening, March 21st. Prizes will be awarded. Refreshments will be served at the close of school. This will be followed by select dancing. Good music in attendance.

At the what party held at the Grange Hall last Thursday evening twelve tables were enjoyed. One side of the hall was devoted to bridge, the center for those who wished to play together all the evening, and the other side of the hall was used for progressive. A very delightful evening was spent by all those present.

Miss Margaret Hanson, a Junior at Bates College, who is recovering from a severe attack of grip at the home of her parents, Mrs. and Mrs. F. R. Hanson, last week received a very kind letter from her mother, who is at the Bates College Winter Carnival, engraved as follows: "Highland Winner, Bates Outing Club, 1925."

HONOR STUDENTS AT GOULD ACADEMY

Announcement of class honors was made on Tuesday. Eleven pupils in the class have maintained an average rank of 90 per cent or above. The highest rank was 93.2 per cent. The names in order of rank are as follows:

Electa Chapin, Gay Thurston, Barbara Davis, Ronald Stevens, Ann Musgrave, Alice Linnell, Richard Harris, Richard Holmes, Clyde Stevens, Ellen Cottrell, Marion Parsons.

Miss Chapin will deliver the Valedictory and Mr. Thurston the Salutatory. Four others, Miss Davis, Ronald Stevens, Miss Musgrave and Miss Linnell will be given special mention on the Commencement program as honor students, there being a difference of only 1.2 per cent between the highest and lowest standing of the first six students.

GRANGE NEWS

LONE MOUNTAIN GRANGE

Lone Mountain Grange held a meeting in the hall, Saturday with a good attendance. A baked bean and pastry dinner was served at noon by Mrs. C. A. Rand, Mrs. George Learned and S. P. Rand as committee. The program followed:

Song, "Sowing the Seed," Grange Reading, "The Legend of the North Star," Mrs. Alice Thurston Chip Basket, Grange Historical Sketch of Andover, E. M. Bailey Song, "Wayide Blossoms," Grange Readings, Mrs. Mae Hall, Mrs. J. L. Bailey, Frank Gordon

BEAR RIVER GRANGE

Bear River Grange met in regular session Saturday evening, March 7, W. M. Bennett in the chair. Officers present: G. K. Ezra Chapman, A. S. F. I. French, L. A. S. Carle French. Grange opened in form with flag salute and singing of "Star Spangled Banner." A communication was read from "Opportunity Farm," at New Gloucester, Me., asking for funds. One candidate was introduced in the third and fourth degrees. Literary program:

Song, Bro. and Sister French Topic for discussion, "Shall we issue bond to secure money for public improvement, or pay as we go?" Opposed by the W. M. A vote of the members present decided that "the pay as you go" policy is the best.

Short Dialogue, "The Complete Education," by four members

Reading, Brother French Grange proceeded to close. Twenty-two members present. Refreshments were served.

The next meeting, March 21, will be in keeping with St. Patrick's Day as much as possible. The Brothers will have a hat trimming contest, each to bring a hat, trimming and other necessary articles, such as needles and thread, scissors and thimble. Two prizes will be given, first and best. Come and see the fun. Roll call, telling an Irish story.

PLEASANT VALLEY GRANGE

Don't miss it. Next meeting, March 21. Third and fourth degrees. Supper Special program. Mock trial. See the appalling case of E. B. Whitman, Esq., tried before His Honor, Charles McFadden. Come and boost the Grange.

SONGO POND

Mr. E. O. Donahue was a guest of his sister in Lewiston a few days last week. Harry King is cutting and packing ice at his cottage. Roger Clough is helping him.

Miss Myrtle Lapham was a guest of her grandmother, Mrs. Frank Emery, Sunday.

Ernest Merrill and Myron Merrill's teams of Masco are hauling pulp to meadow bank for Al Merrill.

Mr. E. C. Lapham was a visitor in Bethel and Lewiston a few days last week.

Mrs. E. O. Donahue was a guest of her son, Mrs. Roy Cole, at Bryant's Pond, Sunday.

Ray Good was a supper guest at Charles Garman's, Monday.

James Garfield Edwards has gone to Boston for a few days on business.

Charles Kimball, who is stopping in Watford, was a week end guest of his mother, Mrs. Maria Kimball.

James Thibault and James McMillan of Bethel are hauling pulp to meadow bank for E. C. Lapham and boarding with Mrs. Carlton Saunders.

Miss Doris Frost, who has been visiting Dr. and Mrs. Arthur Wiley at Bar Mills, returned home Friday.

CHAPMAN CONCERT

To Be Given in Bethel, Saturday Afternoon, March 21.

We are reminded by the date on the window cards that the Chapman Concert is close at hand. Mr. Chapman and his artists will be most welcome, as these concerts are most unique, and have grown to be the established musical event of our town.

The programme of the Chapman Concert, so soon to be given in our town, is made up of musical gems, to please all classes.

It is with regret that Mr. Chapman announces Mr. Lombardo as being unable to be present at this concert on account of illness, but Mr. Chapman is as usual on the job and has secured a man whose reputation is as far-reaching as Mr. Lombardo's. Mr. Walter Mills is the new singer and Mr. Chapman assures us that we will be well satisfied with Mr. Mills. Miss Wilson will sing two groups of English Songs that will appeal directly to the hearts of the public, also sing the Shadow Song from Dinorah, by Meyerbeer, which was always Galli-Curci's show-piece. Mr. Chapman always makes up programmes that appeal to the popular taste. Tickets are now on sale at Boserman's Drug Store at the extremely low prices of 35 and 50 cents. Don't forget the date, Saturday afternoon, March 21st.

One of the artists which Mr. Chapman will bring to us on his Spring tour is Miss Muriel H. Wilson, a young lyric soprano unknown to Maine music lovers. Miss Wilson is petite and girlish with a sweet smile and pleasing personality. Her voice and manner remind one of Alma Gluck when she first came to Maine, sweet and appealing especially in the mezzo-voice effects. Miss Wilson had an experience similar in a way to Lawrence Tibbett. She sang unheralded at a concert in New York with several better known artists on the same programme. She appealed to the audience however to a greater degree than the others, received all the applause, and was obliged to respond to many encores and was acclaimed the Star of the concert. She has been in much demand, and is sure to be a favorite. It is most refreshing to note the young American singers, American-trained, who are coming to the front and receiving public recognition on their merits. Miss Wilson will sing the old time favorite ballads and songs, as well as operatic arias of the lyric coloratura brilliancy. A great treat is in store for real music lovers.

REPORT OF SPECIAL SCHOOL COMMITTEE

Saturday, March 14, the sub-committee reported in favor of recommending a lot of about an acre for a new school building to be taken from land of U. H. Fox east of Spring Street. The main committee adopted the recommendation and voted to recommend that the town erect thereon a school buildings of four rooms all on one floor.

SCHOOL NOTES

GREENWOOD SCHOOLS

The Spring term of schools in Greenwood will begin March 30.

BETHEL SCHOOLS

Bethel village and West Bethel schools will close April 3 for a vacation of one week.

Other schools in Bethel will close March 27 for a vacation of two weeks.

"GOOD-BY" PARTY

Thursday evening, March 12th, a large company of old friends and neighbors met at the place that for so many years has been the home of E. A. Barker and family. Although a complete surprise, a most cordial welcome was extended to all and a very enjoyable evening spent.

Instrumental music with singing by the crowd, also solos and duets with some very fine readings by Miss Electa Chapin and Miss Dorothy Barback, followed by an original poem written for the occasion, gave quite a variety to the program.

A. B. Sanborn presented gifts to Mrs. Lucretia Barker from Mr. and Mrs. J. P. Skilling, also from Mr. and Mrs. A. B. Sanborn.

A fine town kammark given to the family by neighbors and friends will remind them of friendly folks who are sorry to have them leave Bethel, where they have been helpful, interested citizens for more than fifty years, and the following poem will show that the old time neighborly spirit is still alive.

TO THE BARKER FAMILY

Many years have come and vanished Down life's hurrying stream away,

(Continued on page 8)

ASKED AND ANSWERED

(This is a valuable educational feature in The Oxford County Citizen. Send in your questions, and address them to U. S. Press Association, Continental Trust Building, Washington, D. C. Mention this paper when you write. Enclose two cents in stamps for reply. Do not include trivial matters or questions requiring extensive research.)

Q. Is there any method of estimating the supply of water available in any particular area?

This has been definitely worked out by scientists, and an official report upon the subject says that quantity of ground water available in any area may be estimated by two methods which are known as the water table method and the absorption method. These are somewhat technical, but form a basis for study of the subject. According to the Government's statement referred to the water table is the upper surface of soil saturation, generally shown by the depth at which water stands in well. The level of water in wells rises in the wet season and falls in the dry season. This fluctuation indicates the rate and amount of replenishment of the underground reservoir in the wet season and the corresponding loss in the dry season. After the amount of fluctuation has been determined by measurements made in wells the available pore space in the ground is calculated from information contained in well logs and thus the quantity of ground water gained or lost can be estimated. The absorption method of estimating the supply of ground water consists in determining by current measurements the quantity of water actually lost from streams within the area by evaporation. The amount lost by evaporation is the quantity of water absorbed by the soil and is approximately the annual recharge of replenishment of the ground water.

Q. What is the condition regarding the employment of children in industrial occupations in the states of North and South Carolina?

In North Carolina, according to the United States census, there were in 1920, 188,238 male children between the ages of 10 and 15. Of these there were employed in gainful occupations 49,243. There were at the same time 184,918 females between the same ages, and there were employed in gainful occupations 51,117. In South Carolina the number of boys was 159,035, of whom 37,411 were employed. Of girls there were 159,567, of whom 36,139 were employed in the

so-called gainful occupations. Other states which show very large employment of children of both sexes are Alabama, Arkansas, Georgia, Kentucky, Louisiana, Mississippi, Tennessee and Texas.

Q. What is meant by the term, "lightning prints?"

This was recently explained by the U. S. Weather Bureau. After a person has been struck by lightning, it seems, especially when no serious injury is sustained, it is not uncommon to find some-where on the patient's body ramifying pink marks, which generally disappear in the course of a day or two. These marks bear a general resemblance to trees or the venation of leaves, and were at one time supposed to be the photographic images of some objects, produced in some mysterious way by the lightning. It is now known, however, that these marks are not photographs, but are merely the lesions due to the passage through the tissues of a branching electrical discharge.

Q. What creates sun spots?

The Smithsonian Institution at Washington says that when there are few sun spots, as in 1923 and 1924, the sun burns low like a fire that is not stirred. The same authority says that the time for many sun spots is now approaching, and like a fire when the fresh coals are added, the sun will soon send out more heat. Two observers, under the Smithsonian, are carrying on an investigation and they are covering the whole world. One of these stations is in the Nitrate Desert of Chile on a mountain 2,925 feet high. It never rains there. The ground is as bare of life as an asphalt roof. The other station is on a mountain in the Arizona desert. Here it seldom rains, but when it does, it comes down a plenty and lightning comes with it. The reports upon the work of these mountain observatories will be issued by the Smithsonian Institution.

Q. What is an electrical dynamo?

According to a reliable authority of this motor or generator is a dynamo, but in practice only small direct current generators are called dynamo. In the power houses the machines are referred to as generators and alternators. The dynamo, when used to convert mechanical energy into electrical energy, is called a generator. If it delivers alternating current it is frequently called an alternator. When the dynamo is used to transform electrical energy into mechanical energy it is called a motor. Any generator can be used as a motor and any motor can be used as a generator, but in practice the design is different and commercial machines perform much better in the capacity for which they are designed.

Q. Please tell me how to restilver mirrors.

The United States Bureau of Standards has issued a circular giving full information relating to this subject. The Bureau first emphasizes the necessity of having the glass surfaces chemically cleaned by the use of a solvent such as alcohol. Following this, the surface should be again cleaned with nitric acid, and the mirror kept in distilled water and not allowed to become dry. In commercial silvering the cleaning is done with nitric acid by a vigorous scrubbing with a saturated solution of stannous chloride which is carefully rinsed off with warm water. The Bureau says "this is regarded as an essential feature in most of the 'secret processes.'" The "Barbear's Process" is used more than any other for silvering large mirrors, reflecting telescopes, and laboratory mirrors. The "Barbear's Process" can be found in any standard book on chemistry. The undertaking must be conducted with great care because the elements used in silvering are highly explosive.

Q. Where is the greatest producing section for prunes?

A recent bulletin by the Department of Interior describes the Santa Clara Valley of California as "one of the garden spots." The valley has an area of 390 square miles, and contains thousands of acres of orchards that bear many kinds of fruit. The bulletin says "the prune crop of the valley is so large that it dominates the markets of the United States; indeed, a short crop in Santa Clara Valley causes an increase in the price of prunes everywhere in the world."

Q. What is the latest scientific method for the remedy of drunkenness?

Naturally, the Volstead Act. Unfortunately, however, a good many people fail to observe the laws of their country, and for these scientists report that oxygen and carbon dioxide present a ready restoration to persons unconscious through the use of alcohol.

Q. What is the largest official American flag?

The largest official American flag, which hung in the rotunda of the Capitol, during the inauguration, was known as the "Garrison flag," and its size is 24 by 36 feet.

Q. What will restore the polish to silverware that has been tarnished by eggs?

I have noticed that in our house they use egg shell cleaner.

Q. Is there any restriction in the number of terms of office which a president of the United States may hold?

There is nothing in the Constitution, or any statutory law, limiting the number of terms of office in the presidency. George Washington, who might have been king, if he had consented to the plans of some of his friends, might also have held more than two terms of the presidency. But he believed no man should serve more than two terms and he declined to be a candidate the third time, thus establishing a precedent to which the people of the United States have adhered. General Grant sought a third term but failed. Had Roosevelt won at the Progressive ticket in 1912 he would have been substantially a third term, but with an intermission between his periods of service. Mr. Roosevelt declined to permit the name to be used in the convention in 1920, at which time he could undoubtedly have been nominated for another term. The biography of Woodrow Wilson has revealed the fact that the War President would not have objected to a third nomination. But the custom is so well grounded that it is doubtful whether anyone will ever be chosen for the presidency more than twice.

Q. What are the ingredients of an ordinary cooking powder?

I thought cooking powder on the market and I was with other chemists making a cooking powder, would I be so good as to tell me?

Most ingredients are used in making a cooking powder, including eggs, sugar, salt, baking soda, cream of tartar, and other ingredients. It is a complicated process, and I am not a chemist, but I can tell you that it is a very important part of the cooking process.

Q. Where did the name of the French Quarter come from?

The French Quarter is named after the French Quarter of New Orleans, which was the center of French influence in the city.

Q. Where do Manx or tailless cats come from?

Manx cats are a native of the Isle of Man, and are distinguished by having no tail, or only a rudimentary one. It is now nearly extinct, even in the Isle of Man.

Q. Where do Manx or tailless cats come from?

Manx cats are a native of the Isle of Man, and are distinguished by having no tail, or only a rudimentary one. It is now nearly extinct, even in the Isle of Man.

Q. Where do Manx or tailless cats come from?

Manx cats are a native of the Isle of Man, and are distinguished by having no tail, or only a rudimentary one. It is now nearly extinct, even in the Isle of Man.

Q. Where do Manx or tailless cats come from?

Manx cats are a native of the Isle of Man, and are distinguished by having no tail, or only a rudimentary one. It is now nearly extinct, even in the Isle of Man.

CANTON

Mrs. Grace Gile of Fayette has been a guest of her sister, Mrs. Anna B. Dalley, and niece, Mrs. Helen Ellis.

Mrs. Wilma Richardson has been visiting for a few days at Buckfield. Elms Davenport returned home with her for a visit.

Mr. and Mrs. Rufus Stevens of Orr's Island are visiting her sister Mrs. Walter Cannon and family of North Harford. Mr. Stevens, who has been quite ill is on the gain.

Mrs. Margaret Boucher is visiting relatives in Boston.

Mrs. Merton Walker of Peru has been a guest of her sister, Mrs. Violet Dymont.

Mr. and Mrs. Arthur A. Olney, who have been spending the past few months with their son, Harold Olney, and family of Unity, have returned home.

Mrs. Evelyn Dunn is spending a few weeks with relatives in Auburn.

Word has been received of the death of Henry Forhan of Portland, a brother of J. K. Forhan of Canton. Mr. Forhan passed away at the Mayo Bros. hospital at Rochester, Minn., where he submitted to a surgical operation.

The affirmative side of Canton High School debating team and the negative of Buckfield High School held their debate Friday evening at Canton Grange Hall before a large sized audience. The question: "Resolved that the United States should recognize the present government of Russia," was handled in a manner creditable to both teams. Canton's team was Howard Child, Laura Martin, with Emma Abbott, alternate; Buckfield's, Margaret Bicker, Alfreda Annis, with Constance Chesley, alternate. The decision was 2 to 1 in favor of Buckfield. The judges were Prof. Davis of Hebron Academy, Rev. Mr. Wyngaught of Livermore, and Rev. Mr. Atkinson of Livermore Falls. A dinner followed the debate with music by the high school orchestra. Canton's negative team, Elms Dymont, Arthur Dudley, with Harold Dudley, alternate, debated at Buckfield the same evening, the decision being in favor of Buckfield, 2 to 1. Capt. Ray Robinson was one of the judges at the school debate at Livermore Falls, Friday evening.

Mrs. Helen Temple of Portland is a guest of her parents, Mr. and Mrs. J. L. Spear and family.

A special meeting of Pocomah Rock Lodge will be held Thursday evening for initiation.

D. A. Freeman, who submitted to a serious surgical operation about two months ago, is able to sit up a few hours each day, and expects to return soon to his home in Canton village.

Mrs. Olive Bisbee is very ill at the home of her daughter, Mrs. Ezekiel Hines.

Mrs. Lottie Douglass of Winthrop has been visiting her parents, Mr. and Mrs. A. W. Ellis.

Mrs. Minnie Glover and children, who have been at the home of C. W. Walker for some time have returned to their home in Durham.

Mrs. John K. Forhan of Augusta is not as well.

At the whist party Monday evening at Odd Fellows Hall there were seven ten tables.

Word has been received that Mrs. Marion A. Smith, formerly of Canton, remains in very poor health.

Mrs. Margarette Polisher of Farmington has been visiting her parents, Mr. and Mrs. E. K. Hollis. Mr. Hollis is on the gain.

Mrs. W. S. Ingraham of Norway is spending a week with her daughter, Mrs. A. L. Tinnell, and other relatives, while Mr. Ingraham is in New York on business.

The next meeting of the Pocomah Rock Lodge will be held with Mrs. Alice T. Bicknell.

Mrs. G. H. Johnson has been visiting at Lewiston.

The next of the Farm Bureau will be held at the home of Mrs. A. L. Tinnell on all day next week.

Mrs. Inge Thompson of Auburn is a guest of Mrs. Alice T. Bicknell and Mrs. Lillian B. Reed.

At the place of the meeting of the Farm Bureau, a social entertainment was enjoyed and a pleasant meeting enjoyed. Two new names were added to the organization. A delicious lunch of salad, rolls, cake and coffee was served. The next

meeting will be held at the home of Mrs. A. L. Tinnell.

The ladies of the Farm Bureau held a pleasant meeting Tuesday at the home of Mrs. A. L. Tinnell. This was a "social" meeting and several were made and a pleasant meeting enjoyed. Two new names were added to the organization. A delicious lunch of salad, rolls, cake and coffee was served. The next

meeting will be held at the home of Mrs. A. L. Tinnell.

The ladies of the Farm Bureau held a pleasant meeting Tuesday at the home of Mrs. A. L. Tinnell. This was a "social" meeting and several were made and a pleasant meeting enjoyed. Two new names were added to the organization. A delicious lunch of salad, rolls, cake and coffee was served. The next

meeting will be held at the home of Mrs. A. L. Tinnell.

ing of April 10th will be on meal planning and home economics, when Miss Jackson of the State Department will be present.

Miss Mima Dymont entertained two tables of whist Wednesday evening and refreshments were served.

The Canton schools will close this week for a week's vacation.

Robert W. Poor is spending a few days in Boston.

The senior class of Canton High School is preparing the drama, "Safety First."

Veda Burkes is visiting her parents in Buckfield.

Stomach Worms

Intestinal Worms

also pin worms—sometimes called seat worms—are often troublesome in childhood, and the cause of much anxiety to many parents who have not suspected the cause of the symptoms that disturb the health of their children.

Feetfulness, loss of appetite or too much appetite at times, feverishness, disturbed sleep, restlessness and grinding the teeth in sleep are often noticed, in the little ones, and these disturbing symptoms should not be allowed to continue.

If worms prove to be present you may rely on the good old "P. ATWOOD'S Medicine" to clear them out. Thousands of mothers throughout New England have reared families of strong, healthy, well-checked children by using them in time. Small dose, big results. 50 cents.

L. F. Medicine Co., Portland, Me.

PROBATE NOTICES

To all persons interested in either of the estates hereinafter named: At a Probate Court held at Auburn, within and for the County of Androscoggin, on the fourth day of March in the year of our Lord nineteen hundred and twenty five, by adjournment from day to day from the second Tuesday of said March, the following matters having been presented for the action thereupon herein-after indicated, it is hereby ordered, That notice thereof be given to all persons interested, by causing a copy of this order to be published three weeks successively in the Oxford County Citizen printed at Bethel, in County of Oxford, that they may appear at a Probate Court, to be held at said Auburn, on the second Tuesday of April next, at nine o'clock in the forenoon, and be heard thereon, and object if they see cause.

EDWARD M. CARTER, late of Bethel in said County of Oxford deceased. First account presented for allowance by Henry H. Hastings, administrator.

WILLIAM H. NEWELL, Judge

Visitor Finally "Got on to City Fellers"

"When I was up to Kay See the other day, I like to have had the life busted out of me a couple of times," related Burt Blunt of Petunia. "I was riding up from the union depot in a taxicab, and when we went to turn out for another car something went wrong with our steering works. The taxi swerved, switched sideways and turned bottom up. The driver crawled out and got a bunch of fellers, and they lifted the car off me and set it up straight. Well, pretty soon we whizzed out of the track again, hit a telephone pole, and turned wrong side up. Another bunch of fellers came and lifted the car off me, and I got in again. My neck was twisted, shoulder strained and my back skinned.

"Looky here—hoo-dang!" says I to the driver, "I'm onto you city fellers! I'll pay you for the ride when we get to the hotel—if we ever do, but I'll be everlastingly did-diggered if I'll pay all them fellers for lifting cars off me!" says I.—Kansas City Star.

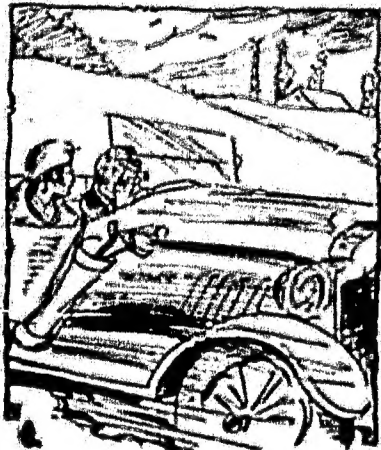

Ancient Idea of Life, Correct, Scientist Says

The ancient allegorical conception of the earth as the mother of life and the sun as the father, though propounded by men ignorant of science, still holds good, Dr. Alex. Hrdlicka, curator of physical anthropology in the Smithsonian Institution, declared in his fifth public lecture on man's origin. Modern biological knowledge virtually confirms the truth of what early civilized man guessed at, he said.

To refer the cause of the existence of man and other organic beings to accident or chance, is to take a superficial and unreasoning view of the question, the speaker asserted.

"Life is no accident," he added. "The whole process of natural evolution is something that always has been and still is inherent in the constitution of the earth, and has been brought about through chemistry, physics and dynamics resulting from this, in connection with stimuli from the sun and other influences upon the earth from the rest of the universe."—Washington Post.

A SAD CASE

"I understand her husband died very suddenly."

"Yes! She told him she did not want an expensive hat this season, and he never required concealment."

After Many Years

After parting 51 years ago, Mr. George Frid and Miss Ann Hubbard were married recently at Sittingbourne, England. Mr. Frid left Baltimore, Kent, and emigrated to Canada in 1870. Miss Hubbard's friends objected to her going to Canada, and letters between the two subsequently ceased, while Mr. Frid married a Canadian woman. His wife died later, and last summer Mr. Frid revisited his old home, where he met his former sweetheart.

Penny Oddly Restored

A man in the north of England tested a new steel name punch by stamping with it his name on a penny. And the next day, in a moment of forgetfulness, paid the coin away for a purchase. Twenty years later his son, while in London, went into a shop for some light refreshment, and when he paid the bill received among the change the penny his father had stamped 20 years before.

Fly's Temperament

An American scientist has been experimenting with flies with a view to lessening their number. He says the experiments proved conclusively that certain flies possess weak temperaments, others masculine, while some are decidedly aggressive. The more aggressive and executive possess a resistance to disease in direct ratio to their temperament.

Outrich Dinner

A roast turkey three feet long and weighing 50 pounds was among the dishes served at a dinner party given by some Australians in London recently. The turkey was sent from Australia in a block of ice and was cooked on a spit before an open hearth.

Golden Rag-Picker

A laborer, giving evidence in a London police court, said: "I am at present a rag picker, and at this trade fortunes are to be made. I have earned as much as 100 (\$200) a week."

HOW

ANIMALS AND BIRDS CARE FOR THEIR APPEARANCE.

It is wrong to suppose that animals, upon waking up in the morning, are ready for the day's work and play. Like human beings, they have to "dress" themselves and, although this may merely consist of taking some sort of a bath and smoothing down ruffled plumage and fur, animals are not contented until they have completed their toilet, writes London Answers.

Dogs and cats are rather particular in this respect. They sit by the fire for hours washing and dressing themselves. More bashful animals select lonely spots where they cannot be observed.

Birds are extremely neat. Many insist on a bath every day. Watch a canary; he will not eat his breakfast before he has had his bath and arranged his feathers. But offer him a bath in a tub that is not perfectly clean, and he will refuse to plunge in.

Swallows bathe only in fresh rain water, so they cannot indulge in the "cold tub" every day. Ducks are also partial to rain water. When a shower falls they ruffle up their feathers to allow the rain to soak in. Ducks living near the sea will fly inland to a great distance for fresh water in which to bathe.

How Taximeter Records Fare Passenger Pays

The principle upon which a taximeter works is that for every complete revolution of the cab's wheels a certain distance has been covered and, therefore, a certain amount of fare is due.

The actual meter consists of a number of clocklike wheels with indicators which show the fare due in terms of dollars and cents. The lowering of the "For Hire" flag brings into play a flexible shaft which connects the meter with the road wheel of the car and at the same time turns a wheel which records the number of times the cab has been hired in the day.

By the different turns of keys on the outside of the meter the driver brings into play gear wheels which record the extra, so giving the fare in total, the whole machine, of course, ceasing to register when the cab stops.

It is, however, possible if the vehicle is hired at "time" instead of "distance" rates to disconnect the meter from the road wheel and set in operation a clock which will record the fare due for the hire by time.—Cleveland Plain Dealer.

How Rice Is "Cultivated"

Rice is not "cultivated" in the sense that corn is. The seed is sown like wheat or oats, after which the ground is flooded until the seed germinates. Then the water is drawn off, but the ground is flooded again later to kill the weeds and a third time when it is about to head. Generally speaking, the height of the rice plant depends on the depth of the water, for the ear always grows above the surface. The grain is produced in heads similar to oats. Shortly before the grain is ripe the water is drawn off and the crop is cut with reapers and threshed much like barley or wheat. Most species of rice are grown on marshy or inundated land, but a few species are grown on higher ground.—Exchange.

How Shoe Sizes Are Named

There are three general systems for measuring shoes: English, used in England and the United States; American and French. The French unit length is the Paris point equaling 2 1/3 of a centimeter, or approximately 4 1/5 of an inch, 15 points or sizes being about four inches. English and American measure is 1 1/3 of an inch, the former counted from the 4 1/2 inch mark, while the latter is counted from the 3 1/2 inch mark. It has been suggested that the English measure be universally used. In the English measure the sizes run from 1 to 13 for children. For adults they continue in a new series. Size 13 is therefore 5 1/3 inches long, while an adult size 4 is ten inches.

How Japan Fights Flies

Following the Japanese earthquake, lack of sanitary facilities caused an enormous increase in the number of flies. To combat the pest, school children in Tokyo and Osaka were offered five cents a hundred for catching them. The response was so great that crowds of clerks were kept busy counting the piles of vittles sent in by the energetic young workers, some catching as many as 1,000 flies. The insects were placed in bottles after being classified and credited to the hunters and were displayed at a public sanitation exhibit—Popular Mechanics Magazine.

How Seamen's Wages Differ

The average pay of the total crew of an American ship, operated by the United States shipping board, is \$3,400 monthly, as compared to \$1,750 for the same vessel of Great Britain; Norway, \$1,600; Holland, \$1,500; Sweden, \$1,400; and France, \$1,300. The monthly pay of an able seaman ranges from \$18 in Japan to \$22.50 in the United States.

THE AMERICAN LEGION

(Copy for This Department supplied by the American Legion News Service.)

COLORADO'S TYPE OF SOLDIER BOYS

John Charles Vivian, attorney of Golden, Colo., now commander of the Colorado department of the American Legion, got tired of governmental red tape during the war. He decided to do a little unraveling himself. He had been under consideration for a commission as major in the judge advocate's department. But the matter hung fire. The commission did not come.

So one day he enlisted as a private in the marines. On the same day that he closed up his law books, his younger brother, Chauncey H. Vivian, then editor of the Boulder (Colo.) News-Herald, dropped the editorial shears, jabbed the brush into the paste-pot and enlisted also—as a private in the marines.

The brothers served together, the younger brother as a private in the squad of which the older was corporal.

John Charles Vivian.

They were discharged together. Later on they were during the same year commanders of their respective posts of the Legion.

The new department commander has been chairman of various departmental committees. He has been alternate national executive committee member for Colorado and chairman of the rehabilitation committee for District 11. Mr. Vivian, who was born at Golden in 1887, was a newspaper reporter while he was studying in the University of Colorado from 1905 to 1911. Then he became state editor of the Denver Times in 1911-1912. He received the degree of Bachelor of Laws from the University of Denver in 1913. Since his graduation he has held various civil offices. He was special counsel to the city attorney of Denver in 1913-1914. He was federal food administrator for Jefferson county in 1918. He later became city attorney of Golden and county attorney of Jefferson county.

Will Seek Amendment to Compensation Act

Declaring that the provision of the adjusted compensation act is unjust which requires a wife, child or parent of a deceased veteran to show dependency at the time of the veteran's death in order to collect the compensation in case the soldier had not filed application for insurance, officials of the Wisconsin department of the American Legion will launch a campaign to have the law amended.

Under the present law, if a veteran dies before filing a claim for insurance, only a wife, child or parent can collect in the order named and the claimants are required to show that they were dependent upon the veteran at the time of his death. Efforts will be made to have the law changed so that the three classes of claimants can collect regardless of dependency.

Not a Kick!

"I just stopped in to tell you," began the man at the complaint desk of the gas company. "That my gas stove blew up yesterday."

"Tell your troubles to a plumber," growled the clerk. "There's no fault of ours; you got no idea how."

"Oh, I'm not kicking," replied the customer cheerfully, as he opened the door. "Only I thought I'd tell you that your blamed old stove stove out at the same time, and I haven't been doing anything but pick up other quarters all over the office ever since. Good day!"—American Legion Weekly.

Cleaning Up the Mess

Brown, during the absence of his wife, was giving a party. Baited, dishes and clear butts were scattered about in profusion. At the height of the revelry Brown was called to the door, and came back with a telegram in his hand.

"Toys," he cried in consternation. "It's from my wife. She'll be home in an hour. What'll we do?"

There was a moment of stunned silence and then Smith jumped up. "I have it!" he shouted. "Let's burn the house down!"—American Legion Weekly.

CITIZENS' MILITARY TRAINING CAMP ACTIVITIES

The patriotic interest of business concerns throughout the country in the Citizens' Military Training Camp movement is being demonstrated in many ways, and its last generous and most substantial contribution to the cause is that of the Eastern Advertising Company in offering to place in two thousand cars and busses throughout New England car cards carrying appropriate publicity with reference to these camps. The railroad companies of New England have also offered to conspicuously post the large posters prepared for that purpose in their railroad stations. Postmasters throughout New England, taking advantage of the authority extended by Mr. John H. Bartlett, First Assistant Postmaster General, and Mr. McKeezie Moss, Assistant Secretary, Treasury Department, are showing great interest not only in exhibiting these posters, but in distributing application blanks, assisting the applicant in his preparation of them, and in furnishing information to all interested parties. Many industries and other business concerns and professions are encouraging young men in their employment to attend the camps, and affording them the opportunity to so attend without loss of their salary for the month necessary for such attendance. Certainly those interested in this great movement for the betterment of the youth of the country have every reason to be encouraged by the demonstration from all sources of a support that spells success for the movement.

Major General Brewster, Commanding the First Corps Area, has just received instructions from Washington which now makes it possible for men who served as enlisted men during the World War to become officers in the Officers' Reserve Corps. The opportunity is made by a change in the regulations and requirements for candidates of the Blue Course at the Citizens' Military Training Camp. (Soldiers who have had previous military experience, such as two or three years in the Army during the War, are now eligible, provided they have passed their 19th birthday and are not over 31 years of age. They must have a high school education, or its equivalent and for technical branches, the necessary technical education. They must also have the personality, appearance, tact, bearing and general adaptability which will fit them, after further training, to be officers of the Officers' Reserve Corps. They must also have the same physical requirements as those required of officers of the Reserve Corps.

Many of the soldiers of the late War have a hankering to put on the khaki for a month during the summer, get back into the mess hall where they recall their campaign days with their friends they made during the War, in to the saddle with the Cavalry and feel the weight of the rifle again on their shoulders. This new ruling of the War Department now makes all this possible and it is expected that quite a number of these War Veterans will enroll for the Citizens' Military Training Camps this year, which will be held at Camp Devens, Ayer, Mass.; Fort Ethan Allen, Burlington, Vermont; Fort McKale, Portland, Maine; Fort Adams, Newport, Rhode Island, and Fort Terry, near New London, Connecticut.

FORD ONE-TON TRUCKS TO HAVE STAKE BODY EQUIPMENT

The Ford Motor Company has added a stake body to its one ton truck equipment and distribution has begun through the dealer organization, it is announced.

Introduction of the stake body follows that of the popular steel cab and body brought out some time ago, for which there has been a constantly increasing demand.

The new body not only meets many commercial requirements, but also is designed to fill the needs of the farmer or truck gardener in handling the products. In addition to the stake sides, provision has been made so that cattle or grain sides may also be used, making the body one of wide utility.

The body may be used in combination with the standard cab, stake which are easily removable permits a platform truck of good proportions.

Except for floor and rack boards, which are constructed from especially seasoned wood, the body is all steel. The floor space is five feet wide and eight

feet, two inches long, sides rise twenty-six inches above the floor.

Racks are in five sections, two on either side and one at the rear. The sections are held together with sturdy steel stakes, ends of which fit snugly into sockets cut into the outer steel frame of the platform. Special connections hold the sections into a rigid body of exceptional strength and durability.

GROVER HILL

Mr. and Mrs. H. A. Lyon entertained a card party Saturday evening. The usual good time was the vote of all. Mrs. Almon Tyler, who has been ill, is gaining, as also is Mrs. Clyde L. Whitman, who has been ill for a week. Evelyn Whitman was unable to attend school a few days early in the week owing to an attack of indigestion. Maurice Tyler is teaming again since the recent fall of snow. Merle Swan and Alfred J. Peaslee from Bethel were calling on friends here Sunday.

Mrs. Bertha Mudgett has completed a beautiful, large drawn rug for a woman in Rhode Island.

James Mudgett is still hauling timber for G. B. Mills.

Almon Tyler is cutting wood for R. Mayberry.

Fred E. Wheeler was a visitor in Bethel and Norway a few days last week.

George Bennett was visiting friends in this place recently, as also was Trus Browne, who is at home for awhile.

WEST BETHEL

Mrs. L. E. Luxton and Mrs. Albert Heath of Bethel were guests of friends in town, Thursday.

George Bennett is attending the auto show in Lewiston.

Clarence Bennett went to Portland, Tuesday.

Miss Doris Jordan spent Friday in Bethel with Mrs. Adner Gurney.

Mr. Gilbert is the new engineer at the Morrill, Adams mill.

SAYS HER RECOVERY IS ALMOST LIKE A MIRACLE

"I Just Wish Everybody Could See What Karnak Has Done For Me," Says New Hampshire Woman

"I just wish you could have seen me a year ago so you could realize what Karnak has done for me," was the enthusiastic state of Mrs. M. E. Patriquin, of 24 Deer St., Portsmouth, N. H. "Two years ago I suffered a complete breakdown from a complication of troubles and I kept losing weight steadily until when I got Karnak recently I had gone down from one hundred and seventy-eight pounds. I suffered from intestinal indigestion so dreadfully that gas would form and roll in my lower stomach and cause such terrible gnawing pains I could hardly stand them. I had

terrible pains in my kidneys and sides and my arms and legs would swell up nearly twice their normal size. My liver was so disordered that my skin was covered with spots. I couldn't find anything to help me, and was awfully nervous and worried over my condition.

"I began to feel the effects of Karnak from the very start, and four bottles of this grand medicine has stopped me from losing weight and set me to gaining instead. The swelling has gone from my arms and legs, the nervousness has disappeared, my skin is rapidly clearing up, and I can actually eat potatoes now without having indigestion. Karnak has simply been a blessing to me for my recovery has been almost like a miracle."

Karnak is sold in Bethel exclusively by W. D. Hosselman, and by the leading druggist in every town.

Spring Repairing and Building

With the coming of spring the ordinary repairs which are necessary must be considered. Not all buildings need repairing, but some do. It may be only a corner block that needs replacing or it may be that it is necessary to shingle.

Anyway, if you are in need of anything in the way of building materials for repairs or new work, let us figure for you through our Bethel branch. We can offer you materials and service which will please you.

Mr. H. I. Bean, our Bethel Manager, will figure with you on any items you may need.

Daddy's Evening Fairy Tale

By Mary Graham Bonner

MAGGIE'S POEMS

Now there was a great stir in Fairyland. All of the little Fairies were busy writing verses. They had heard that a little friend of theirs was going to have a birthday and they wanted to have some verses for her.

The Little Fairies.

He said thought and thought and finally wrote one that was ready. The fairy then wrote this verse: From one who is Queen of Fairyland I send you this verse today. May you live forever, you dear little thing. So we will be happy always!

This was the verse sent by Princess Joy: You're a friend of mine, you truly were dear. May you always, always, always be here. Unless by Fairyland you are near. We can be so happy, you know, I fear.

This was the verse sent by Fairy Princess Twilight: When the cool of evening comes. And the sun sinks over the West. And the twilight shadows dance. We'd like you to be our guest.

This was the verse sent by Little Ellie Elf: Hello-ho, Maggie. Hello-ho, Maggie. Hello-ho, Maggie. That's all I know how to say!

This was the verse sent by Old Mother Nature: Old Mother Nature asked me to say. That as she moved about your way. She always sent the sweetest scent of the day. For she loves you, she asked me to say in my lay.

This was the verse sent by the Fairy Wind: Hello-ho, Maggie. Hello-ho, Maggie. Hello-ho, Maggie. That's all I know how to say!

SOUTH BETHEL

Gerald Walker of South Paris visited relatives a few days last week. Alfred Buck of South Paris was in town over the week end.

Earl Bartlett visited at Mr. and Mrs. Frank Hartshorn's last week. S. S. Greenleaf of Bethel was in town recently.

Eli Jiggins has finished work for Wesley Bean at West Bethel and has returned to his home here. Jack Vashaw has been visiting his brother, Mike Vashaw, and family.

Wesley Bean has finished work at West Bethel and has returned home with his family. Pearl Cole of South Paris was through here one day last week selling meat.

GOV. BREWSTER TO BE PRINCIPAL SPEAKER AT FARMERS' WEEK

The Honorable Ralph O. Brewster, Governor of Maine, will be the principal speaker at the annual Farmers' Week banquet to be held at the College of Agriculture, Orono, Thursday, April 2. The subject of Mr. Brewster's talk has not been announced at this time. However, on April 2 he will meet several hundred men and women from the rural districts of Maine at this annual banquet which is the leading social function of Farmers' Week at the College of Agriculture, John E. Abbott, Master of the Maine State Grange, will act as toastmaster of the evening.

Another talk which will be a feature of the week will be given on Wednesday evening by Frank P. Washburn, Commissioner of Agriculture. At that time Mr. Washburn will tell why Maine is a good state in which to farm. This will be followed by a talk on the mutual problems of the shipper and a common carrier, by W. G. Hutton, Industrial and Agricultural Agent of the Maine Central Railroad.

At last year's meeting the Maine Federation of Agricultural Associations voted to place a tablet in memory of Rufus Allen in the Agricultural Hall of Fame here in Winslow Hall. This year the tablet will be dedicated by the Dean S. Merrill, Dean of the College of Agriculture and Director of the Extension Service. Dr. Clarence C. Little, President of the University of Maine, will deliver the address of acceptance for the University.

Speeches of other speakers will be heard which will include men and women of equal importance and prominence from other states. This year's Farmers' Week starts Tuesday, March 31 and continues until Friday noon, April 3. Talks, discussions, and instructions will be given on practically every phase of agriculture practiced in the State of Maine as well as upon the various problems and practices of home economics. Each year several hundred persons attend this annual event.

BOWDOIN COLLEGE TO ENTERTAIN ONE OF ITS OLDEST GRADUATES

President Sills of Bowdoin has just received definite assurance that the Rev. William C. Pond of San Francisco who graduated from Bowdoin seventy-seven years ago in the class 1848 will be present at the coming Commencement. Dr. Pond is not Bowdoin's oldest graduate as Ebenezer Bean of Urbana, Ill., is six months older than the venerable California churchman. Mr. Bean, however, graduated in 1827, nine years after Dr. Pond's graduation. Dr. Pond represents Bowdoin's longest living link between the Class of 1825, whose centennial will be celebrated this Commencement, and the present day. He had been out of college over twenty-five years when the poet Longfellow delivered his famous "Moriarty Hallucination" fifty years ago at the Commencement of 1870.

For several years Dr. Pond has planned to attend Bowdoin Commencement but each year has always been engaged in some missionary work or other.

TH' OLE GROUCH

I GOT AT LEAST ONE MORE GOOD WALKER IN ME, I DA GON'T USE IT ON YOU! NO, YOU'LL BE A BROODER! THIS HERE COMMUNITY HAS BEEN DWELLING IN PEACE AND HARMONY IN US HUMANS. BUT NOW I'VE GOT A GOOD FRIENDSHIP IN I KNEW I'D GO LIVE IN A CAG, WHERE I'VE BELONG!

Can the East compete

That title is twisted. It should read: Can the West compete with the East in beef production? There is no section of the country that has all the advantages CALIFORNIA NOT EXCEPTED; neither is there any district that has all the trouble; in fact, when all the evidence is in it will be found that the advantages usually offset the disadvantages and that the same brains, industry and stick-to-it-iveness will win an equal amount of returns.

So do not let the bugaboo of long winters and short summers frighten you; Westerners do not talk about their long droughts, their terrible flies, ticks and other things that go to make life miserable to a steer.

High Overhead

Here is a well-managed farm in the corn belt, Iowa, with land at \$250.00 to \$300.00 per acre. They raise good crops of corn, they know how, they buy feeders because their land is too high to produce them; they feed them home grown corn and roughage and buy cotton seed or oil meal. Interest and taxes figure nearly ten per cent of \$25 to \$30 per acre per year.

Then consider another farm in the east of the state highway that can be bought for \$10 to \$25 per acre including buildings which about equals the annual interest and tax charge per acre in Iowa. Just as many bushels of corn will grow on an acre in one district as in the other. Better pasture by far in the east; winters a little more severe in the east, entailing more feed cost during the cold weather. This is offset by less summer feeding with better pastures.

Feeders (meaning thin steers for feeding) should be produced on the home farm. So produced they should grow into market size and quality in thirty to sixty days less time because there would be no loss in growth through about by driving and shipping from place to place and getting acclimated.

Proximity to market is another strong feature that will weigh heavily in favor of the eastern producer.

Once he gets his market educated to the quality of really choice young beefs. This takes time but the existing market is ready to pay for good beef, a price which allows a living profit over cost of production on a well-managed farm.

There are many methods of beef production and the question is which is best adapted to the locality. Suppose we take a twenty-cow dairy on a well-managed farm located far back from milk or cream routes. Instead of continuing there in the production of milk at a loss, breed the entire herd to either an Angus or short-legged, blacky Hereford or Shorthorn bull. Let the calves come in the spring and run with the dams on pasture all summer with what grain ration they will consume twice a day. When ten months of age they should weigh 600 to 800 pounds and will command the highest beef price at any time of the year.

This method is being worked out in Missouri near the Kansas City market and is found one of the most profitable methods of beef production.

With this system no steers are carried through the winter; the crop is marketed within the year; once the milk fed baby beef is introduced it is in strong demand.

There is only one time in the animal's life to grow it cheaply and that is while it is young and there is no combination of grains that will grow and fatten an animal as fast as grain with milk taken direct from the dam. There is truly magic in milk for all animals.

Another method would be to rear them in the fall and feed them home-grown ensilage with all the ripened corn contained in the ensilage, a limited amount of grain, say two or four pounds a day, and fatten them on grass the next spring and summer. This produces larger beef but not as economically as the first method.

Suppose you have a good silo full of well matured corn, ears well developed; how can you get the most out of it? Of the above plans we personally prefer the first for it is a shorter growth period, less risk, quicker returns, and involves less cash outlay, at the beginning. The main problem in this eastern country is the marketing of the pasture grass to the best advantage. This plan is a little less simple, some home-grown grain you have, and it is not easier, surer of profit, and less confining than the care of dairy cows? Either raise good cows and feed them for high production, or beef, choose your course, and stick to it until you learn the ropes.

Feeders, meaning those steers that have grown up on scant pastures of the west, may be purchased at reasonable prices, put on the eastern pastures and sold at the end of the season. The steers gain 200 pounds to 400 pounds in weight and sell usually at an advance over the purchase price per pound.

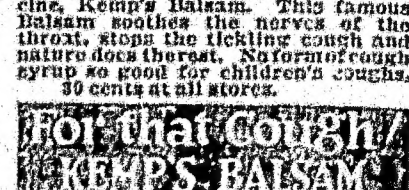

Buy in Fall

Again they say, in the fall of the year, wintered rough without much grain in addition to the good silage and leguminous hay and fattened on grass; as above. The advantage of this plan over the other is that there is not so sharp a demand and there are large numbers on the market in the fall months, resulting in the lower first cost.

Still another plan: Buying range calves 400 pounds in weight, six months old, in the fall and feeding them six months and turning them at 800 pounds in weight. They should have an open shed protected from the winds, plenty of water and dry bedding but no attempt should be made to keep them warm, in fact they feed and gain better in cold quarters. The margins of profit are not large with any of the above plans, one year with another will average a profit, the amount depending upon the ability of the feeders to produce the bulk of the corn and oats used in feeding them.

Beware Of Coughs That Hang On

Pneumonia and serious lung trouble usually start with a cough. So if you have a cold or cough—stop it at once with a few doses of that fine old medicine, Kemp's Balsam. This famous Balsam soothes the throats of the throat, stops the tickling cough and nature does the rest. No form of cough syrup so good for children's coughs, 30 cents at all stores.

For that cough, KEMP'S BALSAM.

Sinners in Heaven

Synopsis

PART I.—Living in the small village of Darbury, old-fashioned and steady place, Barbara Stoddard, daughter of a widowed mother, is to be married to a rich, well-to-do man. The two castaways, a shipwrecked sailor and a young girl, are stranded in the village. The girl is attracted by the sailor's manner of conversation, different from the and-dried conventions of her town.

They get out. Barbara, her mother, and a mechanic. Word few days comes to Barbara that the sailor is missing and his whereabouts are unknown.

It was the old tin box of Dolly's provisions. . . . Tears to Barbara's eyes, and her throat choked. But her companion's presence caused her to wrestle valiantly the grief stirred up afresh by sight of this familiar old box. Little lonely things are ever which bring out the full force of our tragedy.

Blind weakness from Croft's however, was becoming, unconsciously, Barbara's purpose in life just as any display of it was, she felt it, abhorred to him. In the end she watched him unfasten the take out the split-lump, reach at the other contents, and abstract of milk.

Presently he brought some strong talk in a small tin mug. She often used that mug upon pl with Aunt Dolly; the sight of it caused another wave of homesickness and tears.

"I can't drink it," she muttered turning away. "You must," he replied, quivering himself on the ground by her, his countenance inexorable. took no notice.

"Come along! Don't be silly, barn!" Quickly she turned and faced him. Then rather too hastily she the mug; but her hands trembled, the milk splashed over the edge, placed his fingers over hers guided them. And the cool firm brought a peculiar sense of calm security.

"It tasted—queer!" she remarked. Rising, he returned to the wretched unfastening his luggage. "Your case is unstrapped," he presently. "Will you unpack it now?" "Oh—I can't! Not yet," she wearily. "Shall I?"

"No! Oh, dear me, no!" She edged up in alarm. "Well, but—don't you want to for the night?" "No."

"He looked at her in mute inquiry. "You don't suppose," she asked, asperly, "I shall ever—address in places?" As he turned away, she saw some flash of white teeth in the light that she had seen the first they met.

"I advise you to change after supper," was his only remark. stood near the door as if uncertain for a few moments, then rushed upon. "I shall have my supper out here tonight," he added.

There was no one in the hall her choice fell off and she was left to the sound of the door. She looked at the door and saw the door. She looked at the door and saw the door. She looked at the door and saw the door.

The door of many towers stood the midnight darkness in the of the island. The door of many towers stood the midnight darkness in the of the island. The door of many towers stood the midnight darkness in the of the island.

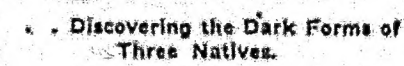

When he ceased, the door of many towers stood the midnight darkness in the of the island. The door of many towers stood the midnight darkness in the of the island. The door of many towers stood the midnight darkness in the of the island.

Patent and State governments now say in many big highway projects. New highway development for road and previous made promises still to be a bonus.

The old industry is spreading to new fields. Automobile taking up large amounts of free road to help industry. Increase, action and growth in construction of private good returns.

CHURCH ACTIVITIES

CHRISTIAN SCIENCE CHURCH

Spring Street

Sunday School at 10:00 A. M.

Sunday services at 10:45 A. M.

CONGREGATIONAL CHURCH

Rev. S. T. Acheson, Minister

Monday, March 22:

10:45: Service of worship conducted by the pastor.

12:00: Church School.

7:15: Panny Crosby service conducted by Miss Carrie Wight. This is a good opportunity for all to learn about the blind hymn writer, Miss Crosby, and a good number should be present. The sanctuary C. E. evening offering will be received.

Tuesday, March 24:

8:45: Church rehearsal.

7:30: The fifth talk by the pastor to the Forty Minute Club.

UNIVERSALIST CHURCH

Rev. Charles Eastonhouse, Minister

Sunday morning worship at 10:45.

The minister will preach a series of two sermons upon the subject of "Immortality." Next Sunday the subject will be, "Is death the end?" which will be followed the Sunday following by the subject, "Do the dead speak to the living?" (Mr. Arthur Conan Doyle).

Sunday evening at 7:15: Young People's meeting. Frank Keniston will lead. The minister will speak on the subject, the East versus the West.

Next Friday a social evening will be given to the young people of the church. The minister will give an illustrated lecture, "Paradise and the Holy Grail." This will be the opportunity to use our new lantern machine. Admission will be 15 cents. The lecture will be followed by a free social and refreshments will be served and games to be played.

"Paradise and the Holy Grail," Wagner's celebrated sacred opera and the legends of the Holy Grail and Knights of King Arthur.

Friday afternoon the Ladies' Circle will have a food sale at the store of Grover Brooks.

Tuesday, March 24, the boys of the church will put on a public supper at which baked beans, cold meats, salads, etc., will be served. Tickets for the supper will sell for 25 cents. Supper will be followed by an entertainment which will be free to those who attend the supper. Those who don't attend the supper but want to enjoy the entertainment will be charged 25 cents. The program will consist of musical numbers by the male quartet and young people. The minister will interpret Dutch and Prussian folk songs and give a general talk on the people of Holland.

LOCKE'S MILLS CHURCH

Church School, 1:30 to 2:30.

Worship, 2:30 to 3:30.

3:30: Election of Lay and Rectorial Lay Delegates to Augusta, April 24.

METHODIST CHURCH

"The Singing Church"

Rev. C. B. Oliver, Minister

10:45 A. M. Divine worship and sermon.

12:00 M. Church School.

6:30 P. M. Epworth League.

7:30 P. M. People's evening worship.

7:30 P. M. Tuesday: (Family worship). Prayer meeting.

Inter church basketball is spreading. We hope the interest will grow. "What are we waiting for now?"

Special community worship, April 7-9, inclusive—Methodist, Universalist, Congregational churches will be opened to community on Tuesday, Wednesday and Thursday evenings, respectively. The Lord's Supper will be observed in the Congregational church Thursday evening, April 9. This is a step nearer to real fellowship.

The Methodist Family Supper (free to all constituents) will be at 6:15 Thursday evening. The choir rehearsal will be on the same evening if all are in good condition to sing. (Guests will be on adult tables only).

Saturday P. M. is left free for the Christian concert.

There will be special music after the prayer on Sunday. The sermon will be "Why Are You Not A Christian?" Text: "I am the door."

The program, "Benedict are they that do hunger and thirst," will be repeated next Sunday evening at 7:30 o'clock in a little program with a great message.

At the next Church School Workers Conference Mrs. Bertha Wheeler will bring a paper on Ferguson's little book, How to Run a Sunday School.

EXCUSE US

This is our poor way

To explain what we get to say.

But last Friday at the dance

We failed to look a cheer.

Mr. J. Albert was to have played.

Although sickness had him delayed.

Therefore, be not disappointed with us

But kindly give us your trust.

We made up for the missing spot.

By having Eldridge and Holt.

And Morrison and Mr. "Doc."

Currently they made these runs.

Come again.

THE J. E. JONES LETTER

(Continued from page 1)

factor in industry. General Atterbury, of the Pennsylvania System, told a committee of the United States Senate when it was preparing its report regarding Muscle Shoals, that aluminum was destined to revolutionize the railroad industry and that if it could be produced cheaply enough that it would be used to lighten, as well as strengthen cars and all rolling stock, which would reduce the cost of transportation. He gave these reasons in explanation of his participation in an offer to take over Muscle Shoals from the Government. Many of those who were familiar with the "Ford effect" expressed the belief that Mr. Ford's real interest in Muscle Shoals was based upon the desire, and the possibilities afforded, to manufacture cheap aluminum.

THIS SHOALS SHAKE-DOWN

In the Muscle Shoals shake-down there apparently were three principal industrial problems: aluminum, fertilizers, and power production. Evidently the South wanted everything done to favor all of them, but now it appears that there is a settled opinion that of all the advantages that are possible, that waterpower development and distribution heads the list.

GOVERNMENT PRINTING OFFICE

Last Fall the printers throughout the country were agitated by the fact that the Government Printing Office at Washington was advertising for their help. A large number of them connected with the new jobs that were offered. And now there seems to be a period of lull, whereas so recently the program was one of hiring. There is a hornet's nest in Washington in consequence. For years printers union methods have been obtaining control in the public printing. Roosevelt, when President, started to break it up, but changed his mind. It is now claimed that Public Printer Carter is keeping a great many of the new men in office, but is relieving the old time union printer champions. In the shake-down that is now going on one thing is becoming clear, and that is there will probably be no new jobs for printers at the Government Printing Office for a long time to come.

SLIPS IN THE SENATE

Perhaps no Vice President before Dawes was ever made enough to "have out" the Senate on Inauguration Day. And then Dawes, when his own conduct should have been very exact, had the misfortune not to realize that his duty was to stay with the Senate on March 4, and complete the organization. Instead of that he went to the White House with President Coolidge and then helped in reviewing the parade. Dawes' next bad luck was to slip out one afternoon just for a little nap, and while he was getting in his first comforting lick of sleep, there was a tie vote in the Senate upon the confirmation of Charles B. Warren for Attorney General. If Dawes had been present Warren would have won, and the President would have been saved a humiliating situation, and his first defeat at the hands of what Administration men have been calling a perfectly controlled "Republican majority." Mr. Dawes has had more than his share of "slip-ups" for a man who has been as short a time in office. At the very beginning he seemed in danger of having a serious break with some of the Republican Senate leaders. But that possibility has apparently passed, and Dawes will doubtless draw well in the party hazards.

Robert Johnson, teacher, men; Mrs. Lyman Wheeler, teacher, women.

"GOOD-BY" PARTY

(Continued from page 1)

Since the Barker family settled 'Midst fair Bethel's hills to stay, Honored, loved as worthy people, Nobly they have done their part,— Young at four and eighty; Mother Still sheds gladness from her heart.

Eyes as bright as any maiden's
Cheeks with daintiest flush thereon,
Mild and tongue of ready quickness—
How we'll miss her when she's gone.
We had hoped to have her always
With her gracious words of cheer;
But we're sure new friends will love her
Just as we have loved her here.

"Mongal these hills of dear old Bethel,
"House of God" they named the town,
On whose roads in youth and manhood
Ed has traveled up and down.
On the green and fertile meadows
He has toiled, has ploughed, and sown,
Reaping many a bounteous harvest
As the years have swiftly flown.

Once he wandered from our valley,
Just to see a bit of life,
But returned, much to our pleasure,
With a fine and helpful wife.
Of your voices blended sweetly
In the songs and hymns of praise,
And we long shall miss their cadence
As you travel other ways.

Now when Katherine sits a-sowing
In the shelter of her home,
May she never get so busy
That her thoughts won't sometimes
To the hills of far off Bethel,
And the friends it used to please
When she waved in cordial fashion
From her seat beneath the trees.

Many here have prized your friendship,
Loved you honestly and true;
And we hate to have you leave us
Though you think it's best for you.
No doubt you will call us selfish
When I say that truly we
Hope you'll have some hours of longing
For "the days that used to be."

Yes we trust you'll not forget us,
But when evening lights burn low
You will sit and chat of neighbors
That you had "long time ago."
And may all your talk be kindly
Of the ones you're leaving here,
Who will miss your deeds, so helpful,
And your words of friendly cheer.

Now to help you in your restings,
Give you comfort while you live,
We, your friends and old-time neighbors
A couch hammock to you give
Long enough for all the "grown-ups,"
With a place for each small boy.
So we hope you'll use it often
And to all 'till give much joy.

Please accept this friendly token
From an ever loyal band,
Who, as always, still stand ready
To reach forth the helping hand;
And as you go to a new home
From this house beside the road,
May you find as willing neighbors
To help lift a heavy load.

May you hear as happy greetings
From all neighbors you may find—
May their hearts be just as loyal
As are those you leave behind.
And although our hearts are saddened
At this parting of the ways—
Here's "good luck" to thee and thy
folks

Through all the coming days.
Addie Kendall Mason,
Bethel, Maine, March 12, 1936.

"Helped My Boy"
—a Mother Writes
"Our eldest son, aged eleven, was troubled with persistent constipation until we began giving him

Dr. True's Elixir
A very few doses righted him. His bowels became active and in a short time Robert became regular and his general health improved."—Mrs. O. A. Gibbs, Walbridge, Mass. Only one of many tributes to Dr. True's Elixir.

The True Family Laxative
and warm expeller. Made of pure herbs, pleasant to the taste and effective in correcting constipation in old and young. Large sized family bottle \$1.25; other sizes 50c and 40c.

VOLUME XXX—NU

DANIEL S. HARRIS

In the death of Daniel Harris on Monday, March 11 of his daughter, Mrs. M. at Dorchester, Mass., he called upon to mourn the loss of its most respected and esteemed citizens.

Mr. Hastings was born May 5, 1840, in the hamlet of Abigail Strain Hastings, one of this family. He received in the public schools and Gould Academy, and a practical knowledge of engineering which profession he followed for many years. He was connected with the engineering construction of the Ogdensburg R. R. from May 1871. He remained with the Division of the Maine Central R. R. until 1871. He remained with the Division of the Maine Central R. R. until 1871. He remained with the Division of the Maine Central R. R. until 1871.

He remained with the Division of the Maine Central R. R. until 1871. He remained with the Division of the Maine Central R. R. until 1871. He remained with the Division of the Maine Central R. R. until 1871.
